## Education

National Institute Of Technology, Raipur

Aug 2023 – May 2025

M.Tech, Information Technology

Shri Shankaracharya Institute of Professional Management and Technology

June 2018– May 2022

B.Tech, Computer Science and Engineering

## Experience

Assistant System Engineer – Tata Consultancy Services

July 2022 – Sept 2023

- Acquired practical skills in cloud data warehouse management and optimization techniques.
- Gained hands-on experience in data integration and transformation, leading to improved data quality and accessibility.
- Automated ETL processes** using Snowflake Streams and Tasks, leading to a **25% increase** in data refresh frequency.
- Built and maintained **data warehouses** in Snowflake, **enhancing data retrieval speed by 35%**
- Tech used-** SQL, Snowflake, Jira

Software Intern – Saarc Masts Tech Private Limited

Jan 2021 – Dec 2021

- Led the team of 8 people** and successfully delivered high-quality Android applications through effective collaboration with cross-functional teams, fostering a productive and collaborative work environment..
- Significantly **improved application stability** by proactively identifying and resolving critical bugs, **resulting in a 20% reduction in app crashes**.
- Developed clear and concise technical documentation that streamlined project approvals, demonstrating strong communication and organizational skills.
- Tech used-** HTML, CSS, JavaScript, ReactJs, React Native, Github.

## Technical Skills

**Languages:** C, CPP, Python, SQL, Snowflake, JavaScript.Langchain

**Machine Learning:** Supervised Learning, Unsupervised Learning, Reinforcement Learning.

**Packages:** Numpy, Pandas, Matplotlib, Scikit-Learn, PyTorch, Tensorflow, Gymnasium, PySpark.

**Visualization Tools:** PowerBI

**Cloud Tools:** AWS..

**Tracking/Other Tools:** Jira, Github, Hugging Face.

## Publications:

- A.K. Giri and P. Singh, "**Adaptive Portfolio Management in Volatile Market Using Deep Reinforcement Learning**" 2025 *IEEE International Conference on DICCT*, Graphic Era University, India, March 2025. [Accepted]

## Projects

Autonomous Driving Car Using Carla:

- Developed an autonomous driving agent in CARLA using **Proximal Policy Optimization (PPO)** and **Variational Autoencoder (VAE)** for efficient state representation.
- Implemented reinforcement learning techniques in Python to navigate **urban environments** and **avoid obstacles**.
- Achieved reliable navigation performance, successfully completing over **95% of test scenarios** without collisions, demonstrating the model's robustness and ability to adapt to complex driving conditions.

Portfolio Management using Reinforcement Learning:

- Developed a portfolio management **system utilizing Actor-Critic Deep Reinforcement Learning algorithms**, including A2C, DDPG, and PPO.
- Enhanced the model's annual return from **13% to 23.1%** representing a **46.15% increase in performance**, demonstrating improved decision-making capabilities in financial trading.

Cold E-mailing using AI:

- Developed an AI-powered cold emailing system using **LangChain**, **Groq Cloud**, and **Llama-3.1-70B** with **80%** contextual accuracy.
- Integrated a **vector database** and CSV-based project repository, **enhancing personalization by 65%**.
- Optimized API usage **with Groq's LPU**, reducing response time by **70% for faster email generation**.
